HUNTSVILLE NURSERIES

HIGH QUALITY TREES
SHRUBS, EVERGREENS
AND ROSES

HUNTSVILLE NURSERIES
HUNTSVILLE, ALABAMA

INTRODUCTORY

It is with great pleasure that we present this, our Annual Descriptive Catalog. Our aim has been to give honest descriptions of the various varieties we offer and we have endeavored to avoid exaggeration or over-statements. We have ample facilities and acreage to grow and handle large quantities of high quality trees, shrubs and plants. We solicit your orders, feeling confident that we are able to care for them in the best possible manner, our fifty odd years of experience being a factor in this.

LANDSCAPING SERVICE

Naturally in planting your home and grounds it is your desire that they be pleasing and attractive in appearance. This result can be obtained only by proper selection of varieties and arrangement. To secure this result it is necessary to have an intimate knowledge of plants, their habits, growth, etc. We are prepared to make a pen and ink planting plan for you, this plan while not a blue print will serve the same purpose and will enable you to arrange your planting to the very best possible advantage. This service is free to our customers when they purchase the necessary plants from us. Our plan is as follows:

If you desire us to make this sketch write us and ask for a planting sketch blank which will be sent you immediately, together with full instructions for filling it out. Fill the blank as instructed, return it to us together with your check for \$5.00. We will make the plan, showing the location of the plants together with a list of the plants required and the price (which will be same as shown in catalog). On receipt of your order for the plants as outlined in the sketch we credit your account with the \$5.00 which makes the plan cost you nothing.

Of course we are always glad to make suggestions which are free, but where it is necessary to make a sketch we must make a charge as outlined above as the making of this sketch requires considerable labor and some expense.

We ask that you read our Terms and Conditions carefully. It is necessary that we have certain rules of doing business and we must abide by these rules in fairness to all of our customers.

Terms and Conditions—How to Send Your Order.

If shipment is desired by Parcel Post, be sure to include enough money in your remittance to cover postage charges; the difference, if any, will be refunded promptly.

ORDER BLANK enclosed in catalog should be used in every case. Please be careful to fill in all blank spaces with the information requested. Also be careful to write name of variety wanted, size and price, very plainly. This helps to avoid errors.

TERMS are cash in every case, although we will ship C. O. D. when 25 per cent of the amount is sent with order.

REMITTANCES should be made by Bank Draft, Postal or Express Money Order, but we will accept personal checks where it is impossible for you to secure Postal, Express or Bank Draft.

SELECTION OF VARIETIES. We can sometimes help in selection of varieties and a great many customers prefer to leave the selection with us. We will be glad to give you benefit of our experience and judgment in making up the assortment.

SUBSTITUTION. Please state on the order, in the proper space, whether or not we shall substitute in case we are out of any of the varieties wanted, otherwise orders will be shipped short.

SHIPMENT of nursery stock will travel better by express and we recommend this plan wherever possible. However, we hope that all of our customers will state how they prefer shipments to move, whether by freight, express or parcel post.

CLAIMS will not be entertained unless made promptly on receipt of goods. We shall be glad to investigate any claim, provided it is made as soon as the stock is received.

GUARANTEE. We guarantee to deliver all trees and plants to the forwarding company in perfect condition, but do not guarantee that all the stock will live, as too much depends on the treatment the stock receives after it leaves our hands.

NON-WARRANTY. We give no warranty, expressed or implied, as to the description, quality, productiveness or any other matter of any trees, plants or bulbs we send out and will not in any way be responsible for the crop. We do, however, agree to replace free of charge or refund the purchase price of any trees, plants or bulbs that prove untrue to name, but we will not be responsible for a larger amount and all sales are made with this understanding.

SUITABLE DISTANCES FOR PLANTING.

Apples, Standard	30 to 40 feet.
Pears, Standard	20 to 30 feet.
Peaches and Apricots	16 to 20 feet.
Cherries	18 to 20 feet.
Plums	16 to 20 feet.
Grapes (Bunch)	8 to 10 feet.
Grapes (Muscadine)	10 to 25 feet.
Figs	15 to 18 feet.
Raspberries	3 to 4 feet.
Blackberries	5 to 7 feet.
Strawberries	3½ by 1½ feet.
Pecans	60 by 60 feet.

NUMBER OF TREES OR PLANTS TO AN ACRE.

Apart Each Way.		Apart Each Way.	
3 feet	4,840	15 feet	200
4 feet	2,729	18 feet	135
5 feet	1,742	20 feet	110
6 feet	1,200	25 feet	70
8 feet	680	30 feet	50
10 feet	430	40 feet	27
12 feet	325	50 feet	17

Apples

There can be no doubt but that carefully selected varieties of Apples, well cared for, will produce quantities of satisfactory fruit and certainly nothing can be more healthful than plenty of Apples. Even a few trees will produce sufficient Apples for a small family. The list of Apples we offer has been carefully selected for quality and productiveness. The list covers the season from May until November, and a planting made up from this list will be sure to produce fruit.

We recommend the planting of Apple trees in November or December, although they can be planted safely from the middle of October until early April, but Fall planting will be found best. Apple trees are not very choice about soils. Almost any soil being suitable, but if possible they should be planted in a rich, loamy, well drained soil, a northern exposure being more desirable.

Apple trees should be planted about 30 feet apart each way, the distance being dependent upon the strength of the land. For the first few years the trunks of the trees should be protected from rabbits and clean cultivation should be practiced at all times.

PRICES

FIRST CLASS. 4-6 feet, 50c each; \$4.50 per 10; \$40.00 per 100.

ORCHARD SIZE. 2-3 feet, tied in bunches of 10 and sold in multiples of 10, \$15.00 per 100; less than 100, 20c each.

Stayman Winesap.

Early Harvest. May and June. Medium size; pale yellow; slightly acid; good quality. Ripens at a season when no other Apple is in. Should be in every orchard.

Yellow Transparent. One of the best early market Apples, of medium size; skin yellow; flesh crisp and sub-acid; almost immune to blight.

Red June. Early. Medium size; dark red; white flesh; juicy, sub-acid; ripens over a long period; bears well and is a very heavy cropper.

Yellow Horse. Late Summer. Large size; yellow, slightly red where exposed to sunshine. One of the best cooking Apples and fills in between seasons better than almost any other. Highly satisfactory all over the South.

Grimes Golden. Early Winter. Large; golden yellow; of high quality. Tree vigorous; a heavy bearer.

Delicious. Late Fall. Almost too well known to need description here. Fruit large, dark red, fine grained flesh, crisp and juicy and of high quality. A splendid shipper and prolific bearer.

Yellow Transparent.

Rome Beauty. Winter. Large and handsome; yellow with creamy cheek. Almost covered with bright red where exposed. Its large size and beautiful appearance render it a valuable market sort. Vigorous grower and a heavy, young bearer.

Stayman Winesap. Winter. Larger and more prolific than the old Winesap. Rich, dark red; firm; fine grained and juicy; adapted to a wide range of soils and climates.

Winesap. Winter. Medium size; dark red; good quality; keeps well. Tree is a hardy grower and good bearer. A popular variety and well liked everywhere.

Yates. Winter. Small; yellow with dark red stripes. Not, strictly speaking, a commercial Apple, but because of its sure and heavy crops has proven one of the most desirable southern sorts.

Delicious.

Yellow Hiley.

Peaches

Here in the South we hardly ever have a complete failure of Peaches. Nearly always the Peach trees will set a good crop and if properly pruned and sprayed will bear fruit of high quality. It is not wise to plant a large orchard of Peaches unless one is prepared to practice clean cultivation, careful pruning and thorough spraying at the proper season. These three factors are essential to the success of the Peach orchard. But even when a few trees are not well cared for they will nearly always produce some fruit and certainly more than repay the amount of trouble and expense of growing them.

No home orchard is complete without a liberal planting of Peaches. Care should be used in the selection of varieties so that there will be ample fruit throughout the fruiting season. Our list of varieties begins with the earliest, ripening in May in this latitude and covers the entire season until late September.

The trees should be planted approximately 20 feet apart each way, and best results will be had from plantings made in November and December, although we have secured excellent results from trees planted as late as April 1st.

PRICES

FIRST CLASS. 4-5 feet, 50c each; \$4.00 per 10; \$30.00 per 100.

ORCHARD SIZE. 2-3 feet, tied in bunches of 10 and sold in multiples of 10, \$15.00 per 100; less than 100, 20c each.

Early Rose (Cling). One of the most valuable of the recent introductions; ripens with the earliest; is an extremely free bearer and comes into bearing young. The fruit is roundish, medium to large size and ripens ninety per cent red; is a good keeper and carries well. For several years this is the only early variety that has shown a profit; it is far superior to Mayflower.

Arp Beauty (Free). Medium size; yellow, mottled with bright crimson; flesh is of rich yellow color and is really of very good quality for an early Peach. Tree is hardy and very prolific.

Greensboro (Semi-cling). Large; oblong; white with red blush. Not recommended for commercial orchards, but should be in every home orchard.

Carman (Free). Large; creamy white with deep blush; fine flavor; hardy in production; a good shipper; strong grower and early bearer.

Hiley (Early Belle). One of the best early shippers; large; white with bright red cheek. Has proven one of the most profitable sorts for commercial orchards.

Carman.

PEACHES—Continued.

Yellow Hiley (Free). We are again illustrating Yellow Hiley in color because it has added another year to its wonderful performance. Without a doubt this is the best Peach of recent introduction, ripening with its parent, White Hiley. The fruit is of the same shape and size, flesh a deep yellow; flavor and quality are the very highest. An excellent dessert Peach.

Belle of Georgia (Free). Very large; white with red cheek; firm and of excellent flavor; uniformly large and a very prolific and sure bearer.

Early Elberta (Free). Very large; flesh yellow, firm, juicy and of fine flavor. Ripens just ahead of Elberta.

Elberta (Free). A standard by which all other varieties are judged; very large; yellow with red cheek; flesh yellow, firm, juicy and of high quality; hardy; sure bearer and excellent shipper.

Indian Cling or Blood Cling. An old-time favorite wherever planted and grows to a large size; dark red flesh; a deep red; highly flavored.

J. H. Hale (Free). Larger than Elberta; ripens several days earlier and is superior to Elberta in flavor; a beautiful golden yellow with deep carmine blush. Has proven to be one of the best money-makers of recent introduction.

Elberta.

Chinese Cling (Cling). Large; white with red cheek; excellent quality; exceedingly juicy. A very popular Peach, although not recommended for commercial orchards.

Heath Cling (White Heath). (Cling). Skin and flesh white, tinged with red; tender, juicy and of high flavor. A wonderful Peach for canning and pickling.

Krummel's October (Free). Deep yellow with carmine blush; very late; a splendid shipper and keeps well.

J. H. Hale. Equal to Elberta in Beauty, Superior in Quality.

We will be glad to assist in selecting suitable varieties of fruits if you will tell us how much space you have available. We will gladly prune your fruit trees before shipment if you so instruct.

If shipment is wanted by parcel post, be sure to include in your remittance sufficient to cover postage charges.

Pears

Commercial Pear orchards are not profitable as a rule in the South; Kieffer and Pineapple being the two exceptions. Both of these varieties are profitable in commercial orchards.

We have reduced our list of Pears to only a few varieties. The Bartlett, Duchess and Seckel are high class eating Pears, the remainder of the list being particularly desirable for canning or preserving. A careful selection from our list of varieties will enable one to have fruit throughout the season, to say nothing of the delicious preserves which occupy a place all their own.

Pears should be planted 25 feet apart each way, and after the first season should be cultivated but little, as we have found that where no cultivation is given the trees are less susceptible to blight.

PRICES

FIRST CLASS. 4-6 feet, 75c each; \$6.50 per 10; \$60.00 per 100.

ORCHARD SIZE. 2-3 feet, tied in bunches of 10 and sold in multiples of 10, \$30.00 per 100; less than 100, 35c each.

Bartlett. Probably the most popular of all Pears; large; juicy; yellow; sweet and of high value for marketing or canning purposes; bears early and abundantly.

Duchess. Very large; fine quality; keeps well into the Winter. Tree a strong, vigorous grower.

Le Conte. Large, with a smooth, yellow skin; flesh white, firm and juicy. Tree is free bearer and vigorous in growth.

Garber. Resembles Kieffer in size, appearance and quality. Will succeed almost anywhere; is excellent for canning and preserving, and recommended as a pollinizer for the Kieffer.

Seckel.

Kieffer.

Kieffer. A money-maker on account of its remarkably vigorous growth and early productiveness, its extraordinary size, splendid keeping and shipping qualities, and its excellence for canning and preserving.

Seckel. Fruit medium in size, russet-brown, with a very sweet flavor. The finest flavored of all Pears, and particularly valuable for the home orchard.

Pineapple. Practically blight-proof; a strong, vigorous grower and remarkably productive here in the South. Perhaps the most valuable of all the Pears for the extreme southern part of the United States.

If shipment is wanted by parcel post, be sure to include in your remittance sufficient to cover postage charges.

Bartlett.

Black Tartarian Cherries.

Cherries

There are a large number of varieties of Cherries but only a few suitable for planting in the South. These few varieties are divided into two classes, Sweet and Sour. The Sweet Cherries are intended for dessert purposes and eating while fresh and are not desirable for canning, preserving or pie making. The so-called Sour Cherries are the ones which should be used for pie making and preserving. Our list includes only such varieties as we know to be profitable and satisfactory in every respect. Wherever possible, there should be several Cherry trees planted, as they ripen at different seasons and the planting of more than one variety will prolong the fruiting season and certainly we all want to make the fresh Cherry Pie season last just as long as possible.

Cherries prefer an elevated situation, the soil should be well drained. The trees have but few natural enemies and require but little care, requiring less pruning and cultivation than almost any other fruit. They should be planted 20 feet apart each way, and the planting should be done in the Fall wherever possible.

PRICES

FIRST CLASS. 3-5 feet, 70c each; \$6.00 per 10; \$50.00 per 100.

ORCHARD SIZE. 2-3 feet, tied in bunches of 10 and sold in multiples of 10, \$40.00 per 100; less than 100, 45c each.

Black Tartarian (Sweet). Of large size; heart-shaped; purplish black; flesh tender, juicy and of fine quality. Tree an erect, beautiful grower and heavy bearer.

Governor Wood (Sweet). Light yellow; extremely sweet, juicy and of rich flavor. Tree vigorous and productive.

Large Montmorency (Sour). One of the best flavored Cherries in its class; larger and finer than Early Richmond and ripens ten days later. Tree of rapid growth and a heavy bearer.

Early Richmond (Sour). Extra early; bright red, very valuable for canning. Tree extremely hardy and productive. The earliest pie Cherry available.

Large Montmorency Cherries.

If shipment is wanted by parcel post, be sure to include in your remittance sufficient to cover postage charges.

Plums

Most everyone is familiar with the old-fashioned wild Plum which grows along the roadsides, ditches and abandoned fields, but lots of us do not recognize the fact that in the improved Plums, particularly the Japanese varieties, we have a decided improvement over the wild Plum. The Plum trees, as a rule, are strong, vigorous growers, hardy and have but few insect enemies. There should by all means be a few Plum trees included in every home planting, for preserves and jellies if for no other reason.

In the Compass Cherry-Plum we have what we believe to be the most desirable of all the Plums for preserving purposes. The Compass Cherry-Plum is small but extremely vigorous and hardy, and we have yet to see a year when our trees were not loaded with fruit.

Plums, like other fruit trees, should be planted in the Fall, where possible. The most suitable distance for planting is 16 feet apart each way.

PRICES

FIRST CLASS. 4-5 feet, 75c each; \$6.50 per 10; \$60.00 per 100.

ORCHARD SIZE. 2-3 feet, tied in bunches of 10 and sold in multiples of 10, \$20.00 per 100; less than 100, 25c each.

Abundance (Botan). Medium to large; color bright red and overlaying a yellow ground; cling. Tree strong, thrifty, an upright grower and an early and prolific bearer. One of the best.

Burbank. Large; mottled red and yellow; good quality; cling. Tree a strong, straggling grower and immense bearer.

Red June (Red Nagate). Medium to large; deep red; handsome bloom; very showy; quality good; good shipper; ripens a week earlier than Abundance.

Wickson. Probably the most beautiful tree of all Plums; color deep red; flesh firm, yellow and of very good quality. The principal objection to this variety is the fact that it is inclined to be a rather shy bearer.

Wild Goose. One of the best known of all the Plums; large; deep red when ripe; good quality; very juicy. One of the best native varieties, ripening earlier than the Japanese sorts.

Shropshire Damson. Medium size; dark purple flesh; grown largely for preserving purposes. Probably the best preserving Plum.

Red June. An Ideal Early Plum.

Early Golden Apricots.

Compass Cherry-Plum. A cross between the Sand Cherry and the Plum. Fruit about as large as the ordinary Cherry; very bright red; acid; valuable because of its sure, heavy cropping qualities; used principally for preserving; absolutely hardy.

Apricots

The most delicately flavored stone fruit grown, and if it were not for the late freezes catching the bloom, thereby causing a crop failure, the Apricot would be the most desirable of all fruits, but even with this risk, the crops which do escape will more than pay for the trouble and expense of planting and caring for the trees.

Apricots must be planted on extremely high, well drained ground and a northern exposure is very desirable. Apricots, like all fruit trees, do best when planted in November and December. They may be planted 16 feet apart each way and must be carefully pruned and sprayed to secure best results. After planting, the trees should be carefully watched to prevent borers doing them serious damage.

PRICES

FIRST CLASS. 4-5 feet, 75c each; \$6.00 per 10.

Early Golden. Small; pale orange-yellow; juicy and sweet; highly flavored. Recommended for southern planting.

Royal. A standard variety; medium to large; pale yellow with orange cheek; very desirable and equally valuable for canning or drying.

Niagara Grapes.

Niagara. One of the most valuable white grapes. Bunch and berry large; ripens with Concord. Fruit very tender, sweet and juicy. Highly desirable.

Lutie. A true southern variety. The very best of all for southern planting. Fruit large, brownish red and of delicious flavor. A good, sure bearer.

Scuppernong or Muscadine Type

They are distinctive southern Grapes and are not borne in bunches as are the other Grapes, but are borne in clusters. The Scuppernong type is unique, in that it is remarkably free from disease and insects, as well as decay. The vines are ideal for trellis work and may be trained into any shape or form desired.

PRICES

TWO-YEAR PLANTS. 50c each; \$4.00 per 10; \$35.00 per 100.

Scuppernong. Very large, bronze colored fruit; flesh very sweet; grown in clusters, not in bunches.

James. Large. Fruit of a delicate flavor and is borne in large clusters. A strong growing, black Scuppernong.

Thomas. Medium size, round, dark, fine color when fully ripe. Regarded by many growers as the best for table use of the Scuppernong type. Highest in sugar content.

Grapes

Considering the small space required, no fruit yields more than the Grape. In the South, Grapes will grow in almost any section or location, the vines not being very choice as to the soil. Grapes do best on a well drained, slightly stony soil, but will grow and bear fruit most anywhere.

To secure best results, Grapes should be carefully pruned during the Winter months, December and January being the best time. They may be grown on trellises or arbors and demand cultivation only for the first few years.

In selecting the list of Grapes to offer our customers, we have eliminated all varieties that do not have some particular feature to recommend them, and in our list will be found the very best black, red and white varieties. A planting from this list of varieties will cover the season of fruiting as well as the color range.

PRICES

TWO-YEAR PLANTS. 30c each; \$2.50 per 10; \$20.00 per 100.

Concord. Fruit dark purple, nearly black; extra large and very sweet. One of the best known and most popular of all the Grapes.

Delaware. Fruit red, rather small, juicy and sweet. We think the best table variety grown.

Diamond. Fruit of a greenish white color; very large, sweet and of good quality. Vine perfectly hardy and a good bearer.

Moore's (Moore's Early). A highly desirable early black variety; ripens about two weeks ahead of Concord. The best early black Grape for southern planting.

Lutie Grapes.

If shipment is wanted by parcel post, be sure to include in your remittance sufficient to cover postage charges.

Japanese Persimmons

The fruit of the Japanese Persimmon is not only very large but of such fine flavor and beautiful appearance, we have discontinued growing the native Persimmon. Here on our own grounds we have grown many Japanese Persimmons much larger even than our illustration. Aside from the fruit borne by the Japanese Persimmon trees they also make beautiful ornamental trees, the foliage being of large size and a brilliant, lasting green, which, with the golden fruit, makes them extremely attractive. The Japanese Persimmon tree never grows very large and can be used in almost any planting of shrubs or trees to good advantage.

PRICES

FIRST CLASS. 3-4 feet, 75c each; \$6.50 per 10; \$60.00 per 100.

Hyakume. Fruit large, dark brown, very plump, sweet and meaty. One of the best varieties.

Triumph. Fruit yellowish red, smooth skin. Flesh yellow, fine grained and excellent quality. One of the best varieties.

Tane Nashi. One of the best known Japanese varieties. Fruit large, smooth, symmetrical and ripens early. Bears young and is productive.

Japanese Persimmon, Tane Nashi.

Quinces

The distinct flavor of the Quince puts it in a class all by itself for preserving and canning purposes, Quince preserves ranking with the finest of all preserves. The trees are of somewhat dwarf growth, requiring but little room and practically no attention. We recommend planting Quince trees where space is limited, as they can be planted as close as 12 feet apart and still produce abundantly.

PRICES

FIRST CLASS. 3-4 feet, 75c each; \$6.00 per 10.

Orange. Very large; yellow; rich and of excellent flavor. One of the best.

Meech Prolific. A very vigorous grower and very productive; very large; orange-yellow; of great beauty and delightful fragrance.

Nectarines

Use same soil and cultural methods for the Nectarine as are used for peaches. The trees resemble peach trees very much, both in foliage and habit of growth.

PRICES

FIRST CLASS. 4-5 feet, 60c each; \$5.00 per 10.

Boston. Large, yellow fruit with red cheek; quite sweet and highly flavored.

Red Roman. Greenish yellow with brownish red cheek; flesh firm, juicy and very rich.

Orange Quince.

Price is not nearly so important as quality. Our trees are all of the very highest quality, assuring satisfaction.

If shipment is wanted by parcel post, be sure to include in your remittance sufficient to cover postage charges.

Strawberries

Strawberries require but little room and attention and will do well in any soil adapted to ordinary farm or garden crops. In preparing to plant Strawberries the soil should be prepared to a good depth and enriched with well-rotted stable manure or good commercial fertilizer. For large plantings the plants should be set in rows four feet apart and eighteen inches apart in the row, but in small plantings they can be successfully grown in rows two feet apart and fifteen inches apart in the row. The first year after planting all blooms should be picked off, forcing the growth into the runners. These runners should be trained on to the row, thereby forming a solid mat. The plants should have a covering of leaves or straw placed over them during the Winter. This covering should remain in the Spring and will be found a great aid in keeping the fruit clean.

PRICES

\$1.00 per 100; \$4.50 per 500, postpaid.
By Express, \$8.00 per 1000.

Klondyke. A large, bright red berry of uniform size and a good shipper. Plants grow vigorously and are quite healthy.

Lady Thompson. One of the most profitable of the Strawberries for southern planting, combining large size and good shipping quality.

Senator Dunlap. A heavy producer of high quality. Fruit firm and of fine flavor. Beautiful color.

Aroma Strawberries.

Aroma. In our opinion the best of all the late varieties, being used largely as a commercial sort. Fruit of large size and dark red. Wonderful shipper.

Blackberries

Blackberry culture in a commercial way has grown to be quite a business. When properly grown the fruit is a great deal larger and finer flavored than the wild Blackberry. Then too, by planting the two varieties we are listing, one is assured of fruit both earlier and later than the wild fruit, as the Early Harvest ripens about ten days earlier than the wild Blackberry and the Eldorado ripens after the wild berries are all gone.

Blackberries should be planted in rows six feet apart with the plants about three feet apart in the row. They should be frequently cultivated during the period when they are making their growth. When the young canes have reached the height of three feet the top should be pinched out, which will cause them to branch and increase the next year's crop materially. The fruit is always grown on the preceding year's growth. After the fruit has ripened and has been gathered the canes bearing this fruit must be cut down to the ground, as they will not bear again and only take strength from the plant.

PRICES

70c per 10; \$6.00 per 100.

Early Harvest. Ripens ten days to two weeks earlier than any other Blackberry; very productive and a good shipper. Fruit is of good size and excellent quality.

Eldorado. Berries very large, reddish black, very sweet and without hard core. Late.

To obtain best results it is necessary to mulch and fertilize small fruits.

Eldorado Blackberries.

If shipment is wanted by parcel post, be sure to include in your remittance sufficient to cover postage charges.

Raspberries

Raspberries and cream for breakfast is just about the finest thing that we can imagine and when it comes to preserves—we are just about positive that there is nothing that will equal real "Mammy Made" Raspberry jam.

Raspberries should be planted in rows five to six feet apart, and about three feet apart in the row. They should be given rich soil, well fertilized and should be carefully cultivated throughout the growing season. The fruit is always borne on the preceding year's growth; therefore, all old canes should be removed as soon as the fruit is ripened. This forces the growth into the current season's growth and will make the fruit much finer the following year.

PRICES.

75c per 10; \$6.50 per 100.

ST. REGIS. Sometimes called "Everbearing." Usually produces a good crop in the Spring and a second crop in the Fall. Berries bright crimson, large and have strong Raspberry flavor. Very prolific.

CUTHBERT. Fruit crimson, large, firm and very juicy. A strong, upright grower and perfectly hardy.

CARDINAL. Large, reddish purple fruit; very strong grower and will succeed where other varieties fail.

KANSAS. The most desirable of the black Raspberries for planting in the South. The plant is a strong grower, the fruit large, round, firm and of handsome appearance. Will stand shipping well.

St. Regis Raspberries.

Asparagus

Wherever possible we recommend that Asparagus be planted in rows rather than beds. The rows should be opened 10 to 15 inches deep and filled in with about four to six inches of well-rotted stable manure, thoroughly mixed with top soil. Additional soil being added to bring the prepared bed to within two inches of the surface, then plant, being careful to firm the roots thoroughly, covering with about two inches of good, rich, loose soil. It is not wise to cut any of the first season's growth but allow all stems to mature and make seed.

Asparagus does not take up very much room and is becoming one of the most popular vegetables.

PRICES

STRONG TWO-YEAR CROWNS. \$1.00 per 25; \$3.00 per 100.

CONOVER'S COLOSSAL. Grows to large size; stalks tender and of excellent flavor. In our opinion the best variety for planting.

COLUMBIAN MAMMOTH. A strong, vigorous grower, producing great quantities of clear white stalks.

Rhubarb

PRICES

25c each; \$2.00 per 10; \$12.00 per 100.

Strictly speaking Rhubarb is not nursery stock but belongs in the vegetable garden.

As a pie provider the Rhubarb is not as well known in the South as it is in the North. In the North it is recognized as being very fine for pies and is also used stewed.

Conover's Colossal Asparagus.

Rhubarb.

Mulberries

The fruit of the Mulberry has but little value for human consumption but planted in hog pastures and chicken yards they will pay big dividends, the tree serving for shade and the fruit for food for both hogs and chickens.

The trees should be planted about 20 feet apart each way and they require but little pruning or cultivating.

PRICES.

FIRST CLASS. 4-5 feet, 75c each; \$6.50 per 10; \$60.00 per 100.

DOWNING. Strong, upright grower; fruit large, black. A sure, heavy bearer.

NEW AMERICAN. Fruit large, black and of delicious flavor. Tree of rapid growth and with large, glossy leaves.

HICKS. Very heavy bearer; fruit ripens over a long period.

Figs

Fig trees begin bearing while quite young, the fruit being produced throughout the Summer season. There are but few diseases or insect pests affecting Fig trees, and the fruit makes wonderful preserves, to say nothing of the fine flavor of the fresh fruit.

In Northern Alabama and further north, Figs require a somewhat sheltered position, as they are often killed to the ground by severe freezes, but further south they may be planted in the open.

PRICES

FIRST CLASS. 3-4 feet, 75c each; \$6.50 per 10; \$50.00 per 100.

Brown Turkey. Fruit medium to large, pear-shaped; coppery brown skin with white or yellow tinted flesh. Very productive.

Celestial. Very hardy; vigorous grower. Fruit small but juicy and of excellent quality.

Brunswick. Fruit very large, purplish black, shading to red near stem; of good quality and extra firm flesh.

Pecans

We really believe that a Pecan Grove, properly cared for, is a better investment than life insurance. Properly handled Pecan trees will begin paying dividends in from five to seven years. The returns increase as the tree grows older. As shade trees the Pecan is second to none and they should be planted wherever space is available. In arranging the home orchard, we recommend that Pecan trees be planted 60 feet apart each way, with fruit trees planted in between. The Pecan is an extremely long-lived tree and will not require very much room until after ordinary fruit trees have died out.

In planting, the trees should be planted as deep or a trifle deeper than they stood in the nursery row, and if the Summer after they are planted is extremely dry, the trees should be well watered. Care should be used in planting to see that the roots are firmly placed in the soil, and for the first year it will be well to stake the trees. They should be carefully cultivated and fertilized for the first few years, after which they will require practically no cultivation and but little pruning. The only pruning necessary being to shape the head as desired, and this, of course, should be done during the first year's growth.

Pecan Trees Cannot be Shipped by Mail.

PRICES

FIRST CLASS. 4-5 feet, \$1.15 each; \$10.00 per 10; \$90.00 per 100. 2-3 feet, 90c each; \$8.00 per 10; \$70.00 per 100.

Frotscher. Medium to large size; nut rather long, tapering, slightly plump; rich meat. Tree very hardy and strong grower. Originated in Louisiana.

Schley. Thrifty, strong grower. Nut rather long, well filled and of high quality.

Stuart. Probably the best known and most valuable of all the Pecans. Extremely hardy and a strong grower. Nuts of good size, plump and well filled.

Success. Large size, oblong nut; the meat is full, plump and the quality very good. Desirable where Pecan scab is prevalent.

Chestnuts

Prices, \$1.00 each.

AMERICAN SWEET. A native tree too well known to need description. Nuts sweet and of delicate flavor.

JAPAN MAMMOTH. Of dwarf growth, not strictly speaking, a tree; productive and bears extremely young. Nuts of immense size, fair quality, not so highly flavored as the native American.

Frotscher.

Schley.

Walnuts

Prices, \$1.00 each.

ENGLISH WALNUT. Tree valuable for its shade as well as nuts, which are thin-shelled, full-meated and delightfully flavored.

JAPAN WALNUT. The tree is a strong, vigorous grower, bears well and is highly productive. Is valuable as a nut and ornamental tree. Nuts rather thick-shelled and flavored somewhat like the Butternut.

Stuart.

Brown Turkey Fig.

Deciduous Shrubs

The planting of the home is done with several definite ends in view. Primarily the planting is done for the purpose of changing a house into a home and adding that charm that can be had only by the judicious use of plants.

There is greater opportunity of expressing one's individuality in the planting around the house than in the construction of the house itself. The main factors to be considered are the location of the house, its surroundings and, of course, the amount of money to be expended is also an important factor.

If you are not quite sure just what you should have to make yours an attractive home, we will be glad to help you work out the details of your planting and will suggest the proper plants to be used. Please refer to inside front cover page where you will find an outline of our Landscaping Service.

Where it is impossible to plant the entire property, the first consideration should be given to the foundation planting, that is the planting of shrubs or evergreens around the foundation of the house, the idea being to tie the house into the surrounding grounds, eliminating that air of detachment borne by houses until after planting has been done. In our opinion the foundation planting should come first, even before the planting of shade trees. In the foundation planting it is advisable to use an informal plan and plants with informal habit of growth. Care should also be exercised in placing the taller growing shrubs next to the house with the lower growing varieties on the outside.

If shipment is wanted by parcel post, be sure to include in your remittance sufficient to cover postage charges.

Althea—Hibiscus, Rose of Sharon.

From our list of varieties it will be quite easy to select just the plants best suited for every purpose. Many of the shrubs listed are valuable for foliage and fruit as well as for flowers, and inasmuch as the majority of the flowering shrubs are in flower only once during the season the foliage should be considered; then too, by a careful selection of varieties one may have flowers of one kind or another throughout the entire Summer season. It will be found advisable to group shrubs of the same variety together as much as possible, as shrubs, like humans, are at their best when surrounded by their friends and kin.

The shrubs we are offering are all strong, healthy, thrifty, two- and three-year-old plants.

Almond, Flowering - Amygdalus

A beautiful, early blooming, dwarf shrub of shapely, compact growth, especially valuable because of the profusion of flowers which come very early in the Spring. We offer two varieties, white and pink, which are identical in habit of growth, the only difference being in the color of the flowers. **Price, 75c each.**

Althea - Hibiscus, Rose of Sharon

A tall, upright, hardy shrub of strong, vigorous growth, and adapted to almost any soil; flowers in great profusion in midsummer and continues to flower until early Fall. There are a number of valuable varieties, both single and double. We list what we consider the best.

Price of all varieties, 50c each; \$4.50 per 10.

Anemonaeflora. Very large, double red.

Bicolor Hybrida. Double; white with beautiful purple center.

Coelestis. Single, blue flower.

Jeanne d'Arc. Double; pure white. The best of the whites.

Pulcherrima. Double; white striped with pink.

Rubis. Single, bright red flowers.

Totus Albus. Single flower; pure white. Very beautiful.

Violet Clair. Almost double; violet.

Buddleia—Butterfly Bush.

DECIDUOUS SHRUBS—Continued.

Deutzia

Dwarf Deutzia (*Deutzia gracilis*). A very dwarf, low-growing bush, never taller than 3 feet. Is covered very early in the Spring with pure white, bell-shaped flowers. Highly desirable. **Price, 50c each; \$4.50 per 10.**

Pride of Rochester. A fine, large-growing shrub. Flowers pink in the bud and turn to white when full grown; blooms early. **Price, 50c each; \$4.50 per 10.**

Dogwood - Cornus

A valuable class of shrubs, with handsome, variegated foliage in some, ornamental bark in others, and all with showy heads of flowers, followed by ornamental fruits. All of easy culture in most soils.

White Flowering (*Cornus florida*). Small growing tree covered in the early Spring with a mass of large, white flowers. **Price, 60c each; \$5.00 per 10.**

Red Flowering (*Cornus florida rubra*). Habit of growth and time of flowering almost identical with the white variety, but flowers are red or pink. **Price, \$1.75 each; \$15.00 per 10.**

Red Twigged (*Cornus sibirica*). Grown as a shrub. Branches are of a deep crimson. Very beautiful during the Winter. **Price, 50c each; \$4.50 per 10.**

Exochorda Grandiflora - Pearl Bush

A highly desirable, tall-growing shrub. Large, pure white flowers almost covering the plant. Blooms in early Spring. **Price, 75c each; \$6.00 per 10.**

Forsythia - Golden Bell

A very showy, early-blooming shrub. Will thrive in almost any soil. Flowers are borne in great profusion in the early Spring and are of beautiful rich golden yellow. **Price, 50c each; \$4.50 per 10.**

Forsythia—Golden Bell.

Barberry - Berberis

Thunbergi (Japanese Barberry).

A splendid, hardy, dwarf-growing shrub. Particularly desirable for massed planting against foundation walls or where a low-growing hedge is wanted. Dark green foliage through Summer, changing to various shades of crimson in the Fall. In the Fall the plants are almost covered with beautiful bright red berries which stay on nearly all Winter. **Price, 50c each; \$4.50 per 10.** (Also see Hedge plants).

Butterfly Bush - Buddleia

While comparatively new, this shrub has attracted more attention than almost any shrub of recent introduction. Of graceful, drooping habit of growth. Blooms in midsummer and flowers are borne in great profusion at the tip of every piece of new growth. Color violet. **Price, 50c each; \$4.00 per 10.**

Calycanthus Florida - Sweet Shrub

One of the best known shrubs; of quick, bushy growth, bearing fragrant, chocolate colored flowers. **Price, 60c each; \$5.00 per 10.**

Crape Myrtle - Lagerstroemia Indica

Perhaps the best known and most desirable of the older shrubs. Grows to a large size. Flowers produced in profuse panicles, appearing in midsummer and continuing through until Fall. We can furnish in four colors, pink, white, purple and red. Specify color wanted. **Price, 75c each; \$6.00 per 10.**

Cydonia Japonica - Japan Quince

A dense, twiggy bush, its branches covered with sharp, stout spines and dark, glossy foliage. It is a prolific bloomer and in May the plant is a red blaze of color. The quince-shaped, fragrant fruits of golden yellow remain a long time in the Summer. **Price, 75c each; \$6.00 per 10.**

Deutzia, Pride of Rochester.

Crape Myrtle.

If shipment is wanted by parcel post, be sure to include in your remittance sufficient to cover postage charges.

Tartarian Honeysuckle.

Honeysuckle - Lonicera

These vigorous, tall-growing shrubs are invaluable for screening and massing effect with their dense, green foliage and showy, red berries appearing in Summer, and continuing until early Fall. They are one of the most desirable shrubs. Fine for tall hedges. Can be kept trimmed.

Fragrant Bush Honeysuckle (*Lonicera fragrantissima*). Vigorous, strong growing shrub, almost evergreen in this latitude, blooms in late Winter or very early Spring, flowers creamy white or light yellow, very fragrant. Sometimes called Christmas Honeysuckle. Price, 50c each; \$4.00 per 10.

Japanese Bush Honeysuckle (*Lonicera Morrowi*). A highly decorative, vigorous growing shrub. Flowers of creamy white in early Spring, followed by red berries which stay on far into the Winter. Price, 50c each; \$4.00 per 10.

Red Tartarian. A beautiful shrub of upright, medium growth, purplish red flowers appearing in late Spring, followed by crimson fruit; highly desirable for beauty. Price, 50c each; \$4.00 per 10.

Hydrangea Arborescens.

DECIDUOUS SHRUBS—Continued.

Hydrangea

No class of shrubs is better known than the Hydrangeas, as they include some of the most showy plants in cultivation. Transplant easily, have no diseases, and bloom when there is a scarcity of flowers.

Hills of Snow (*Arborescens grandiflora alba*). A strong growing, perfectly hardy shrub producing great quantities of beautifully formed white flowers. Somewhat like the old-fashioned Snowball. Price, 75c each; \$6.00 per 10.

Large Flowering Hydrangea (*Hydrangea paniculata grandiflora*). An old-time favorite. A strong grower and profuse bloomer. Flowers are white and borne in immense pyramidal panicles, beginning to bloom in July and continuing until frost. Price, 75c each; \$6.00 per 10.

Oak Leaved Hydrangea (*Quercifolia*). A large, vigorous growing, upright shrub; thrives in a somewhat shady place with plenty of moisture; large, dark green foliage resembling oak leaves; in Fall these leaves take on wonderful colors, from light red to deep brown, remaining on the plants until late Fall. Flowers creamy white in large panicles. One of the best plants we have, both for flowers and color of foliage. Price, \$1.00 each; \$8.00 per 10.

Hypericum Moserianum - Gold Flower

A very beautiful dwarf shrub of compact habit and beautiful foliage; flowers a clear yellow, resembling a single rose, borne in great profusion throughout the Summer; desirable for planting in front of taller-growing shrubs and for border work. Price, 75c each; \$6.00 per 10.

If shipment is wanted by parcel post, be sure to include in your remittance sufficient to cover postage charges.

Hypericum Moserianum.

DECIDUOUS SHRUBS— Continued.

Jasminum

Italian Yellow Jasmine (*Jasminum humile*). A small, low-growing shrub with bright green branches and small, bright yellow flowers borne in clusters throughout the Summer. Perfectly hardy and well adapted to moist soils. Price, 75c each; \$6.00 per 10.

Naked Flowering Jasmine (*Jasminum nudiflorum*). A graceful, low-growing shrub with a profusion of bright green foliage and yellow flowers which are borne in great profusion during January and February before the leaves appear. An excellent plant for use in cool, shaded spots where other shrubs will not do so well. Price, 75c each; \$6.00 per 10.

Lilac - Syringa Vulgaris

No need to recall the many virtues of this favorite and charming old-fashioned shrub, since they are known to everyone. We are all familiar with the pretty cool green of their leaves and the delightful fragrance of their flower trusses. Suffice it to say they are perfectly hardy and will grow wherever they are planted.

Purple Lilac. A large, free-growing shrub. Beautiful, dark green foliage. Flowers a bluish purple. Blooms in early Spring. Price, 75c each; \$6.00 per 10.

Common White Lilac. Same habit of growth as the purple. Flowers white. Price, 75c each; \$6.00 per 10.

Common Snowball.

Mock Orange - Philadelphus

Are mostly large shrubs, growing from six to ten feet high. Of vigorous habit, very hardy, with large, handsome foliage and beautiful white flowers produced in great profusion. They merit a place in every collection of shrubbery.

Coronarius. Will be found highly desirable for growing with other shrubs. Of strong, vigorous growth. Blooms in early Summer. Flowers of pure white borne in large clusters. Price, 50c each; \$4.00 per 10.

Gordon's Mock Orange (*Philadelphus Gordonianus*). Blooms later than Coronarius. Flowers are pure white and borne

Mock Orange—Philadelphus.

Purple Lilac.

in dense clusters. Price, 50c each; \$4.00 per 10.

Snowball - Viburnum

A group of hardy shrubs with handsome, showy flowers, produced in large, globular clusters. All of the flowers are sterile and radiant and appear in numerous, compact balls. An old-time favorite and one of the best of the flowering shrubs. As specimen plants the Snowball has few rivals and for grouping and massing makes possible many charming effects.

Common Snowball (*Viburnum opulus sterile*). An old-time favorite. Grows to a large size and produces an abundance of globe-shaped, white flowers. Price, 75c each; \$6.00 per 10.

Japanese Snowball (*Viburnum plicatum*). An extremely handsome shrub with beautiful foliage and snowy white flowers borne in large clusters. Price, \$1.00 each; \$8.50 per 10.

Spirea

All of the Spireas bloom extravagantly, which makes them decidedly striking. A good collection of them will give flowers the entire season. There is a great variety in their inflorescence and in the habit of the shrub, so there can be no danger of monotony in such a collection. All the species are easily grown and will be found useful for specimens, groups and borders.

Dwarf White Spirea (*Callosa alba*). Of compact, dwarf growth, with upright branches crowned with large, flat clusters of white flowers borne through the Summer. Price, 75c each; \$6.00 per 10.

Lace-Leaved (*Spirea Reevesiana*). We consider this variety the best of the strong growing Spireas for the South. Flowers perfectly double, pure white, and borne in great profusion. Price, 50c each; \$4.00 per 10.

Spirea Van Houttei.

Spirea Anthony Waterer.

Crimson Spirea (*Spirea Anthony Waterer*). A dwarf, compact-growing variety. Perfectly hardy and highly desirable for bordering purposes. Flowers are of a bright crimson, lasting throughout the Summer. Price, 75c each; \$6.00 per 10.

Bridal Wreath (*Spirea prunifolia*). A medium size shrub of graceful habit of growth. Beautiful green foliage. Flowers small, white, double and borne in clusters the entire length of the branches. Price, 60c each; \$5.00 per 10.

Snow Garland (*Spirea Thunbergi*). A beautiful, small-growing, dwarf shrub. Branches slender and somewhat drooping. Foliage narrow and a yellowish green. Flowers small, white. Blooms very early. Price, 75c each; \$6.00 per 10.

Bridal Bower (*Spirea Van Houttei*). The strongest growing of all the Spireas, and considered by many horticulturists to be the most beautiful and satisfactory shrub grown. Grows about 6 feet tall, with spreading and drooping branches which in early Spring are a solid mass of snowy white blossoms, from which the name is derived. It is perfectly hardy and grows anywhere. Highly desirable for specimen or mass planting. Price, 40c each; \$3.00 per 10.

Blue Spirea (*Caryopteris incana*). A dwarf-growing shrub producing lavender-blue flowers from mid-summer until Fall. Not entirely hardy, but valuable on account of foliage and color of flowers. Price, 60c each; \$5.00 per 10.

If you are undecided about the plants best suited to your particular need, do not hesitate to write us—see our proposition on introductory page.

If shipment is wanted by parcel post, be sure to include in your remittance sufficient to cover postage charges.

Snowberry - *Symphoricarpos Racemosus*

A very showy shrub with slender branches. Small pink flowers followed by large, white berries which stay on well into the Winter. Conspicuous in mass planting but not desirable for a damp, poorly-drained location. Price, 50c each; \$4.00 per 10.

Sumac

Very attractive shrubs and small trees make up this family—a family that is highly prized in landscape work on account of the brilliant autumnal colors of its foliage. The showy clusters of berries likewise add to its value in the shrubbery planting. Any soil that is well drained is suitable for the Sumacs.

Fragrant Sumac (*Rhus*). A shrub of medium size, somewhat rambling habit of growth. Foliage rather small and distinct with a distinctive spicy odor. Flowers greenish white appearing in early Summer, followed by large clusters of scarlet berries. Very valuable for planting in dry, barren locations. Price, 75c each; \$6.00 per 10.

Weigela Rosea.

Weigela

Beautiful shrubs that bloom in April and May. The flowers are produced in so great profusion as to almost entirely hide the foliage. They are very desirable for the border or for grouping and also as specimen plants for the lawn. After blooming, all of the wood which bore flowers should be cut off, as the next season's flowers are all borne on new wood, consequently pruning will increase the number of flowers greatly.

Candida. Very beautiful green foliage; white flowers; blooms in the early Spring. Price, 60c each; \$5.00 per 10.

Eva Rathke. Hardly as vigorous as some of the other varieties, but perhaps the most beautiful of all; flowers a deep carmine-red. Price, 75c each; \$6.00 per 10.

Rosea. If you can have only one Weigela, by all means plant this variety, which is of vigorous growth. Flowers are a deep pink and borne in great abundance. Price, 60c each; \$5.00 per 10.

Variegata. Not so rank a grower as the preceding varieties. Foliage variegated green and white. Very attractive flowers, pinkish white and borne in great profusion. Price, 75c each; \$6.00 per 10.

Symphoricarpos Racemosus—Snowberry.

Coniferous Evergreens

The greatest advantage in using Coniferous Evergreens for beautifying the home is that the Evergreens retain their foliage and colors throughout the Winter when color is at a premium. Our list, while not large, is complete enough to permit most any idea being carried out. For base or foundation planting we recommend Dwarf Golden, Bonita and Globe Arbor-Vitae, the Sabina and Pfitzeriana Juniper. Where the house is on high enough foundation to permit their use, Pyramidal Golden and Green Arbor-Vitae, Virginia Blue Cedar, English and Irish Junipers may be used as background for the lower growing varieties. As specimen plants grown by themselves, Cedrus Deodara and American Hemlock will be found most desirable.

It is necessary to give all Coniferous Evergreens plenty of room to develop and ample sunlight, otherwise they will not be at their best and the Golden varieties will lose their golden color unless they have plenty of sunlight.

We are always glad to help with suggestions as to arrangement of plants and will be glad to furnish more detailed information on the varieties we are listing. Please refer to inside front cover page for information regarding our Landscaping Service.

Dwarf Golden Arbor-Vitae.

Evergreens Cannot be Shipped by Parcel Post.

Arbor-Vitae

This group contains the more popular forms of lower growing Evergreens. Pyramidal or Globe shapes may be had and are popular for foundations, groups, hedges, cemeteries, vases, window boxes; in fact for every purpose an Evergreen is wanted.

Dwarf Golden (*Biota aurea nana*). Very compact, dwarf growing, golden Arbor-Vitae. Ideal for cemetery lots, window boxes and tubs. The best of all the dwarf-growing, golden Arbor-Vitae. Price, 12 to 15 inches, \$2.00 each; 18 to 24 inches, \$3.00 each.

Pyramidal Golden (*Biota aurea conspicua*). Of pronounced pyramidal habit of growth; foliage a deep golden; the most attractive of all the pyramidal Arbor-Vitae. Price, 18 to 24 inches, \$2.00 each; 2 to 3 feet, \$3.50 each.

Bonita. The most beautiful of all the dwarf-growing, green Arbor-Vitae; is of extremely compact growth, cone-shaped and with beautiful color which it retains throughout the Winter. Price, 18 to 24 inches, \$2.50 each.

Chinese (*Biota orientalis*). A tall-growing, hardy, pyramidal variety. Foliage a dark green. Holds its color throughout the Winter. Price, 18 to 24 inches, \$1.50 each; 2 to 3 feet, \$2.00 each; 3 to 4 feet, \$3.00 each.

Globe (*Thuja occidentalis globosa*). A very dwarf, globe-shaped variety. Foliage is of a bright green. Well adapted for planting in tubs and porch boxes. Price, 12 to 18 inches, \$2.00 each; 18 to 24 inches, \$2.75 each.

Pyramidal (*Thuja occidentalis pyramidalis*). A tall, decidedly pyramidal grower. Valuable where a columnar Arbor-Vitae is wanted. Foliage bright green and holds its color well through the Winter. Price, 18 to 24 inches, \$1.50 each; 3 to 4 feet, \$3.00 each.

Siberian (*Thuja occidentalis Wareana*). A dense, broad, regular pyramidal with dark green foliage. Price, 18 to 24 inches, \$1.50 each; 2 to 3 feet, \$2.50 each.

Pyramidal Arbor-Vitae.

Cedars

Deodar (*Cedrus deodara*).

One of the most satisfactory Evergreens for this climate. The tree attains a great height; the branches and foliage are extremely graceful, the foliage being of a beautiful blue-green color and quite feathery in appearance. **Price, 2½ to 3 feet, \$5.00 each.**

Juniper - Juniperus

English Juniper (*Juniperus communis*). Of a dense, pyramidal growth with slightly drooping branches. Foliage grayish green. **Price, 18 to 24 inches, \$1.00 each; 2 to 3 feet, \$2.00 each; 3 to 4 feet, \$3.50 each.**

Irish Juniper (*Juniperus hibernica*). Of rigid, upright growth and extremely formal in character. Foliage deep green with bluish green tinge. **Price, 18 to 24 inches, \$1.25 each; 3 to 4 feet, \$2.50 each.**

Sabina Juniper (*Juniperus Sabina*). Of somewhat drooping habit with dark green foliage; desirable where a low-growing Evergreen is wanted; does well in almost any soil. **Price, 18 to 24 inches, \$2.00 each; 2 to 3 feet, \$3.50 each.**

Pfitzeriana Juniper (*Juniperus Pfitzeriana*). A very graceful, bushy plant with bright green foliage; holds its color

well. **Price, 18 to 24 inches, \$2.50 each; 2 to 3 feet, \$3.50 each.**

Virginia Blue Cedar (*Juniperus virginiana glauca*). An extremely attractive variety, being of very compact, symmetrical habit of growth. Intense blue; desirable as a specimen plant. **Price, 2 to 2½ feet, \$3.50 each.**

Retinispora

Golden Cypress (*Retinispora plumosa aurea*). Of very strong, open habit of growth; pyramidal in form with graceful, golden green foliage. **Price, 18 to 24 inches, \$2.00 each; 2 to 3 feet, \$3.00 each.**

Green Cypress (*Retinispora pisifera*). Identical in habit and growth to the Golden Cypress, but foliage is a bright green. **Price, 18 to 24 inches, \$2.00 each; 2 to 3 feet, \$3.00 each.**

Veitch Silver Cypress (*Retinispora Veitchi*). The most showy of all the Retinisporas, the foliage being of a light, silvery blue-green. Distinctive in habit of growth. Does not grow quite as tall as the other Retinisporas listed. **Price, 18 to 24 inches, \$2.50 each; 2 to 3 feet, \$3.50 each.**

Spruce - Picea Excelsa

Norway Spruce. Of rapid growth, gracefully drooping in habit, regular in outline and perfectly hardy. Grows to a large tree. **Price, 18 to 24 inches, \$1.50 each; 2 to 3 feet, \$2.50 each.**

American Hemlock (*Tsuga canadensis*). A beautiful broad-growing tree of pyramidal form with graceful, spreading branches slightly drooping; dark green, shiny foliage; grows to immense height. **Price, 18 to 24 inches, \$2.50 each; 2 to 3 feet, \$3.50 each.**

Irish Juniper.

English Juniper.

Bonita Arbor-Vitae.

Evergreen Shrubs

A great many of the evergreen shrubs do well in locations too shady for either Conifers or Deciduous shrubs; many of them have not only beautiful green foliage but flowers as well. We call particular attention to *Abelia Grandiflora*, the grandest of all the evergreen shrubs. This plant is desirable from every standpoint, developing with proper care into a beautiful specimen; may be trained into a hedge, or in mass planting adds a touch not obtainable by any other plant.

In arranging plantings, liberal quantities of the evergreen shrubs should be used for planting among deciduous shrubs, as their beautiful green foliage will serve as a background for the deciduous shrubs while in flower.

Abelia Grandiflora

The most beautiful evergreen shrub we know. Of graceful, arching habit of growth. Brightly colored branches covered with dark, glossy green leaves which stay on through the Winter. Flowers are white, tinged with pink, and are borne in clusters from early Spring until frost. Price, 75c each; \$6.00 per 10.

Cape Jasmine

(*Gardenia florida*).

A truly southern evergreen shrub, of medium growth, with large, shiny green foliage and waxy white blossoms of great fragrance. Flowers almost continuously from May until Fall. Not hardy out-of-doors north of Nashville, Tenn. Price, 85c each; \$7.50 per 10.

Abelia Grandiflora.

Euonymus

Japonica. A compact, upright-growing evergreen shrub with bright, dark green foliage; stands trimming well and shows up beautifully as a specimen plant. Price, \$1.00 each; \$9.00 per 10.

Sieboldiana. A highly desirable evergreen shrub of arching growth. Well suited for mass planting. In the Fall almost covered with red seed, suspended from floral envelope. Price, 75c each; \$6.00 per 10.

Carolina Cherry - *Prunus Caroliniana*

A shrub of large size; dark green, glossy foliage which it retains throughout the year; yellowish white blooms in profusion, followed by dark purple berries in the Fall; can be used either as a specimen plant or where a tall-growing evergreen screen is desired. Price, 18 to 24 inches, \$1.00 each; 2 to 3 feet, \$1.50 each.

Mahonia

A very desirable low-growing evergreen shrub. Leaves are large and thorny edged, somewhat similar to Holly, except much larger. The leaves are dark green during the Summer and in the Fall turn to all shades of crimson, bronze and orange. Does well in almost any location, but is particularly desirable for shady spots. Price, \$1.00 each.

Carolina Cherry—*Prunus Caroliniana*.

If shipment is wanted by parcel post, be sure to include in your remittance sufficient to cover postage charges.

Privet - Ligustrum

Japanese (*Ligustrum japonicum*). A compact shrub of rapid growth. Large, dark green foliage. White flowers in Spring, followed by clusters of blue-black berries. Stands trimming well. **Price, 75c each; \$6.00 per 10.**

Lucidum (*Ligustrum lucidum*). Somewhat similar to the preceding variety in general appearance, but the foliage is a darker green and very shiny. Will do well in almost any soil and is highly desirable for foundation planting, or with a little care will make a beautiful specimen for lawn planting. **Price, \$2.00 each; \$17.50 per 10.**

Nepaul (*Ligustrum nepalense*). A graceful spreading evergreen shrub with thick, silvery, dark green foliage. White flowers, followed by clusters of blue-black berries. Valuable for banking against walls or makes a fine specimen plant. **Price, \$2.00 each; \$17.50 per 10.**

Dwarf Boxwood

(*Buxus Suffruticosa*).

Largely used for edging and border work; is of very slow growth. **Price, 20c each.**

Japanese Privet—*Ligustrum japonicum*.

Climbing Vines

Our list of vines covers all the most desirable ones and includes vines for every purpose. For rock work the Ampelopsis, either Boston Ivy or Virginia Creeper, are the best. For large trellises or other large areas the Honeysuckle, Kudzu Vine or Wisteria are most desirable. For small trellis work the Clematis should be used.

Boston Ivy - *Ampelopsis Veitchii*

One of the finest hardy climbers for covering walls. Clings closely to the smoothest surface, covering with overlapping foliage. Color is a fresh, deep green, changing to the brightest shades of crimson and yellow in Autumn. **Price, 50c each; \$4.00 per 10.**

Virginia Creeper - *Ampelopsis Quinquefolia*

Large, deeply cut leaves which turn to a beautiful crimson in the Fall. Fine for covering trees, walls, rocky surfaces, etc. **Price, 50c each; \$4.00 per 10.**

Clematis

A beautiful class of hardy climbers; many of the varieties have flowers 5 to 6 inches in diameter. They are very valuable for training around and over pillars, verandas, fences, rock work, etc.

Paniculata (Sweet-Scented Clematis). Flowers are of medium size, fragrant, pure white, borne in immense sheets in the late Summer. **Price, 50c each; \$4.00 per 10.**

Henryi. A large-flowering variety. Creamy white flowers and vigorous grower. **Price, \$1.00 each; \$8.50 per 10.**

Jackmani. Flowers very large, velvety violet-purple. **Price, \$1.00 each; \$8.50 per 10.**

Madame Edouard Andre. Large flowers of crimson-red. The best of its class. **Price, \$1.00 each; \$8.50 per 10.**

Clematis Paniculata.

If shipment is wanted by parcel post, be sure to include in your remittance sufficient to cover postage charges.

CLIMBING VINES—Continued.

Honeysuckle

The delightful fragrance of the Honeysuckle flowers and the pleasing foliage make them favorites for covering the trellis, porch or any place where an attractive vine is desired.

Hall's (*Lonicera Halliana*). Vigorous in this latitude. Flowers white, changing to yellow. Very vigorous, strong grower. Price, 40c each; \$3.00 per 10.

Scarlet Trumpet (*Lonicera sempervirens*). The most beautiful and brilliant of all the Honeysuckles. The foliage is bluish green. Flowers brilliant scarlet, followed by scarlet berries. Price, 40c each; \$3.00 per 10.

Yellow Trumpet (*Lonicera sempervirens flava*). A beautiful, strong-growing vine. Bright green leaves. Flowers trumpet shape and of deep yellow. Price, 40c each; \$3.00 per 10.

Kudzu Vine

Large foliage which makes a dense shade. Makes a tremendous growth in one season. Not recommended for porch planting but for covering unsightly walls or out-houses. Price, 35c each; \$3.00 per 10.

Honeysuckle.

Wisteria.

Wisteria

Grand, free-flowering vines with handsome, showy flowers. They are among the best and hardest of ornamental vines and are well adapted for training on porches, arbors, etc. For best development, a deep, rich soil should be provided by trenching and enriching, for they amply repay for any favors of this kind. When well established, a greater profusion of blooms may be secured by rather severe pruning, cutting back the lateral shoots to short spurs.

We are not offering the ordinary seedling Wisteria, but are offering instead grafted plants which are sure to bloom. The price is somewhat higher, but the results from the planting of these grafted plants will more than pay for the slightly increased cost.

White (*Sinensis alba*). Flowers almost pure white. Vine of strong growth and extremely hardy. Price, \$1.00 each; \$8.50 per 10.

Purple (*Sinensis*). Light purple and blue flowers in the early Spring. Vine of a strong, hardy habit of growth. Price, \$1.00 each; \$8.50 per 10.

Select your vines carefully, keeping in mind the purpose for which you are planting them and using the vine best adapted to that purpose.

If shipment is wanted by parcel post, be sure to include in your remittance sufficient to cover postage charges.

Hedge of Amoor River Privet.

Hedge Plants

Where fences are to be used, by all means discard the old-fashioned eye-sore made of boards, wire or iron, and use instead a hedge of living plants. Once planted your fence of Privet or Barberry is permanent and requires no paint or repairs to keep it looking its best, asking only a little trimming from time to time.

We are listing only a few varieties of Hedge Plants, as these varieties will be found to cover almost all requirements for a formal hedge. If it is desired to have a dense hedge which is to be kept well sheared, then we recommend the use of the Amoor River Privet. The California Privet is also good, but slightly more formal in its habit of growth, while the Barberry should not be used where thorns are objectionable.

In planting a hedge, a trench fifteen inches deep should be dug and in this trench should be put four or five inches of well-rotted barnyard litter which should be mixed with soil. The plants may then be placed in the trench at proper distance and the earth filled in. To secure best results, pruning should be commenced at time of planting and kept up throughout the season.

Privet - Ligustrum

Amoor River (*Ligustrum sinense*). The most desirable of all the Privet family. In this latitude almost, if not quite, evergreen. It makes a large shrub with upright branches. Leaves dark green and lustrous; flowers are white, growing in erect panicles. It is adaptable to shearing and can be trimmed into any shape or form desired, and if properly cared for will make a close, dense hedge. **Price, 18 to 24 inches, \$6.00 per 100; 2 to 3 feet, \$8.00 per 100.**

California (*Ligustrum ovalifolium*). Of upright growth. Popular for hedges in the North and East. Not as desirable in the South as the Amoor River Privet. Leaves are dark green and very glossy, but shed in midwinter. **Price, 18 to 24 inches, \$5.00 per 100; 2 to 3 feet, \$7.50 per 100.**

Barberry - Berberis

Japanese (*Berberis Thunbergi*). Full description of this plant will be found on page 13. Valuable where a hedge of low-growing character is wanted.

Its small, glossy leaves are out early in the Spring, succeeded by yellow flowers. The foliage turns a bright red in the Fall and is followed by red berries. It is a graceful, drooping shrub, making an elegant variety for hiding foundation walls or planting in the corners by steps, etc. Also does well in shady places. **Price, 12 to 18 inches, \$20.00 per 100.**

Barberry Hedge.

Kaiserin
Augusta Victoria.

La France.

Etoile de Lyon.

Roses

Beyond question the Rose is the most beautiful and satisfactory of all flowers. In the South we are particularly fortunate in being able to grow outside many varieties not hardy enough to stand the rigid northern Winters.

We believe that we know Roses, know those varieties best adapted to southern culture and conditions. We grow annually great quantities of Roses, numbers of which are not suited to southern culture, but the list we offer in this catalog we offer with the assurance that each and every one of them is the best of its class and color.

Your Rose garden should be located where the plants will have plenty of sunlight and where the Roses will not be affected by large trees or shrubs, either shading them or drawing nourishment from the soil. Clay or sandy soil is best and there should be plenty of well-rotted manure worked into the soil before planting. The plants should be cultivated frequently and kept absolutely free of weeds and grass. All old and decayed branches should be cut off, as the flowers are borne only on the new growth. Protect in Winter by covering with at least six inches of leaves or coarse manure, which may be removed or worked into the soil in the Spring.

All roses will be pruned for planting before shipment.

Prices—All Everblooming Roses, 75c each; \$6.00 per 10.

White Roses

Bessie Brown. Of a distinct type in shape and color. Marvelously beautiful. Erect stems; full deep bloom with enormous petals. White, flushed with pink, growing deeper toward the center.

Kaiserin Augusta Victoria. Pure white without a trace of pink. Splendid, large buds and superb, full, double blooms. A steady grower and a steady bloomer.

Snow Queen (Frau Karl Druschki). Hardy everywhere. A vigorous grower with bright green leaves; long buds; magnificent snow-white flowers with large saucer-shaped petals. Rightly named and is one of the best white Roses.

White Maman Cochet. Very large and beautifully formed in bud and bloom. Pure waxy white, taking a faint pink flush out-of-doors. Vigorous and blooms abundantly.

Pink Roses

Jonkheer J. L. Mock. Flowers of large size and wonderful form. A beautiful clear pink, reverse side of petals rosy, silvery white; is a strong, healthy grower and flowers are borne on strong, stiff stems.

If shipment is wanted by parcel post, be sure to include in your remittance sufficient to cover postage charges.

Snow Queen.

PINK ROSES—Continued.

La France. An old-time favorite by which all other Roses are judged; flowers a silvery rose shaded to pink with satin-like petals of wonderful beauty; blooms continuously throughout the season.

Paul Neyron. The largest of all Roses. Blooms of bright shining pink, beautiful, very double, full and finely scented. Blooms freely throughout the season. Stems almost thornless.

Pink Maman Cochet. Rich rosy pink, shading to silvery rose on outer petals; exquisite in color and delightfully fragrant. Unquestionably the best of the pink Tea Roses.

President Taft. A beautiful, shining shell-pink, in tints of distinctive color; beautiful globular-formed perfect buds and flowers in greatest profusion; one of the best of the recent introductions.

Radiance. Brilliant rosy carmine shaded with rich opaline-pink tints in the open flower, which is large; full, of fine form with cupped petals; a constant bloomer and is highly satisfactory.

**Sunburst.**

William R. Smith. A strong, vigorous grower; a distinct type producing pointed buds of a soft salmon-pink blended with rose in great profusion from early Spring until late Fall.

Yellow Roses

Alexander Hill Gray. Deep lemon-yellow; large, full flowers with high pointed center, of perfect form, freely produced and strongly perfumed. One of the very best yellow Roses offered.

Duchess of Luxembourg. One of the richest color combinations known to Roses. An apricot ground, shaded orange, yellow and pink. By long odds the finest yellow bush Rose.

Etoile de Lyon. Golden yellow. A healthy, vigorous grower, blooming freely early and late. Full, deep, rich flowers. Very sweet.

Los Angeles. Another new variety and one of the most desirable outdoor Roses of recent introduction. Distinct in color which is a rich flaming pink, shaded golden yellow.

Madame Butterfly. Flowers of wonderful beauty, being a harmony of light pink suffused with apricot and gold. In bud the color is a lovely shade of Indian-red with yellow at the base. The open flowers are perfect in form, clear and brilliant in color and of delightful fragrance.

**Pink Radiance.**

If shipment is wanted by parcel post, be sure to include in your remittance sufficient to cover postage charges.

YELLOW ROSES—Continued.

Ophelia. Flowers of salmon-flesh, shaded rose at outer edge of petals. Quite fragrant and of perfect form, both in bud and flower.

Sunburst. Without a doubt the yellowest of all yellow Roses, a color range from orange-copper to the deepest golden yellow; flowers on unusually large, long stems and buds are of surpassing beauty.

Red Roses

Etoile de France. A brilliant, clear crimson-red, with vivid cerise center. Large flowers on long, stiff stems. Remarkably vigorous and free blooming.

General Jacqueminot. Still holds its place as the premier of red Roses. Perfectly hardy and a strong, vigorous grower; large, shapely buds and handsome blooms of a bright, shining crimson. Very rich, brilliant, velvety and fragrant.

Gruss an Teplitz. Perfectly hardy and very valuable for bedding or mass planting; fiery crimson, sweetly fragrant and produced in great quantities.

**General
Jacqueminot.**

Gruss an Teplitz.

Special Varieties

Price, \$1.00 each; \$8.50 per 10.

Crimson Baby Rambler. Dwarf Crimson Rambler which bears bright crimson flowers in clusters from early Spring until frost.

Marechal Niel. One of the best known and most popular varieties grown in the South. Cannot be classed with or compared to any other variety; is a strong, vigorous climber, covered all Summer with beautiful golden yellow flowers and buds; the most fragrant of all Roses.

Hadley. Deep, rich, velvety crimson flower, with well formed buds and long, stiff stems. Flowers are borne throughout the season and have great fragrance.

Red Radiance. Clear red without a trace of any other color; is a remarkable bloomer, being constantly in flower from early Spring until freezing weather. A strong, vigorous grower and perfectly hardy.

Moss Roses

Crested Moss. Deep pink buds surrounded by mossy fringe and crest. Very fragrant. Strong grower.

Red Moss. Light color. Large, full flowers and a very vigorous grower.

White Moss. Rosy pink flowers. Very large, full and fragrant. Good Fall bloomer.

If shipment is wanted by parcel post, be sure to include in your remittance sufficient to cover postage charges.

Hadley.

Crimson Rambler.

Flower of Fairfield
(Everblooming
Crimson Ram-
bler). Brilliant crimson. Flow-
ers almost continuously in bril-
liant clusters from early Summer
until frost.

Paul's Scarlet Climber. An
entirely new variety,
combining vig-
orous growth,
wonderful foli-
age and abso-
lute hardiness,

together with flowers almost as
large as those produced on bush
Roses; in color a brilliant scarlet
which lasts well.

Silver Moon. Another splendid
climber, of strong, vigorous
growth, beautiful foliage, im-
mune to mildew. Flowers a clear,
silvery white, of large size and
quite fragrant.

Tausendschoen (Thousand
Beauties). Varying in
shade from a delicately
flushed white to a deep
pink or reddish crim-
son; in bright clusters,
almost covering the
handsome green foliage.
A climbing Rose that
comes to us from Ger-
many. It gets its name
from its many flowers
and their variation in
coloring.

White Dorothy Perkins. A
pure white sport of
Dorothy Perkins, with
which it is identical in
variety and habit. A
valuable addition to the
hardy climbing class.
The plant is a strong,
rampant grower, cover-
ing a large porch or
trellis in a remarkably
short time.

Climbing Roses

Price, 50c each; \$4.00 per 10.

Climbing American Beauty. Flowers of
large size, good form, of rich, red
color, passing to crimson. Very fra-
grant. Good foliage and absolutely
hardy.

Crimson Rambler. One of the most pop-
ular of the climbers. A rapid grower
and perfectly hardy; flowers in rich
clusters of vivid crimson. One-year
plants will attain a height of 10 to 20
feet in a single season and the second
year they will produce a marvelous
profusion of their rich, glowing crim-
son flowers.

Dorothy Perkins. Beautiful shell-pink, which
holds for a long time, shading to a lovely
deep rose. Very sweetly scented, hardy
and a strong grower.

Excelsa or Red Dorothy Perkins. Intense
crimson-scarlet. Double flowers in bril-
liant clusters set in glossy green foliage.
Extremely vigorous and one of the hand-
somest of all climbers.

Paul's Scarlet
Climber.

If shipment is wanted by parcel post, be
sure to include in your remittance sufficient
to cover postage charges.

Shade Trees

In selecting shade trees due consideration should be given to the particular location and requirements. In our list we have shade trees suitable for most every purpose. The Umbrella Tree, Texas Umbrella Tree and Weeping Mulberry are not, strictly speaking, shade trees, but are intended to be grown where but little shade is required and where a specimen effect is wanted.

A home without ample shade is not a home in any sense of the word. Many people are not familiar enough with varieties of shade trees to permit their selecting those trees best suited to their particular location. We will be glad to help in selecting shade trees if you will tell us what you require.

Elm, American White (*Ulmus americana*). One of our best known and most appreciated native trees. It is of rapid growth and beautiful appearance. Leaves of moderate size and the tree is ideal for permanent shade. **Price, 8 to 10 feet, \$1.50 each; 10 to 12 feet, \$2.00 each.**

Flowering Peach (*Amygdalus persica*). A large shrub or small tree, bearing a profusion of flowers in early Spring before the leaves appear. A beautiful, decorative tree where height is desirable. We offer the Flowering Peach in three colors, white, pink and red. **Price, 85c each; \$7.50 per 10.**

Maple, Silver (*Acer dasycarpum*). An extremely hardy, rapid growing tree of large size. Very valuable for producing a quick shade. Fine for street planting. **Price, 8 to 10 feet, \$1.25 each; 10 to 12 feet, \$1.75 each.**

American White Elms.

Maple, Sugar (*Acer saccharum*). A well known and popular variety, somewhat pyramidal in its habit of growth. Foliage of a beautiful green through the Summer, changing to all shades of gold, scarlet and crimson in the Fall. Not quite as quick in growth as Silver Maple, but highly desirable. **Price, 8 to 10 feet, \$1.50 each; 10 to 12 feet, \$2.00 each.**

Magnolia grandiflora (Southern Evergreen Magnolia). A beautiful, pyramidal evergreen tree with large, pure white flowers. Foliage dark green. Tree large, handsome and vigorous. Not hardy in the North. **Price, 4 to 5 feet, \$2.00 each; 5 to 6 feet, \$2.50 each.**

Poplar, Carolina (*Populus deltoides monilifera*). Not recommended where permanent shade is desired. Pyramidal in form with large, glossy leaves. **Price, 8 to 10 feet, 75c each; 10 to 12 feet, \$1.00 each.**

Poplar, Lombardy (*Populus nigra italica*). This tree grows to an immense height. May be used to good advantage for road-side planting or to break the monotony of low, round-top trees. Also valuable as a screen or windbreak. **Price, 8 to 10 feet, 85c each; 10 to 12 feet, \$1.25 each.**

Sugar Maple.

If shipment is wanted by parcel post, be sure to include in your remittance sufficient to cover postage charges.

SHADE TREES—Continued.

Red Bud; Judas Tree (*Cercis canadensis*). A native tree which flowers in early Spring, branches being practically covered with reddish purple flowers. The heart-shaped foliage is dark green throughout Summer and Fall. Price, 5 to 6 feet, \$1.00 each; 6 to 8 feet, \$1.50 each.

Texas Umbrella Tree. A rapid growing, umbrella-shaped tree which needs some training to perfect it. One of the most desirable small trees for the South; not hardy in the North. Price, 75c each.

Umbrella Tree (*Catalpa Bungei*). Particularly valuable for formal effect; a compact, symmetrical head on a straight, clean stem. Nothing else can quite take its place. Very popular. Price, \$2.00 each.

Umbrella Tree—Catalpa Bungei.

Weeping Mulberry. An extremely graceful, hardy tree with the long slender branches drooping to the ground and covered with bright green foliage, making this an extremely attractive and desirable ornament on any lawn. Price, \$2.50 each.

Weeping Willow (*Salix babylonica*). A very beautiful tree of weeping habit, attaining a height of 30 to 40 feet, with slender, olive-green branches and long green leaves. Very beautiful where given plenty of room. Price, 8 to 10 feet, \$1.50 each; 10 to 12 feet, \$2.00 each.

Golden Weeping Willow (*Salix babylonica aurea*). Of same habit of growth as the variety listed above, but not quite so vigorous in growth. Limbs are of a beautiful golden yellow; foliage green with a yellow cast. Price, 8 to 10 feet, \$1.75 each; 10 to 12 feet, \$2.25 each.

Lombardy Poplar.

An ideal arrangement is plenty of Evergreen Shrubs about the foundation of the house to furnish green and flowers throughout the Summer, and cheer during the bleak Winter months. Shade trees not only for shade but as a background for the house add beauty to the home.

Hardy Perennials

We are offering only a selected list of perennials, the varieties having been carefully selected to give best results in southern plantings. All of the perennials do best in strong, fertile soil with plenty of moisture and good clean cultivation. The appearance of your perennial planting will be greatly improved if the old flower stems and dead leaves are all removed after the blooming period.

Perennial Phlox

The ground on which you expect to plant your Phlox should be thoroughly spaded to a good depth, working in plenty of well-rotted barnyard litter and thoroughly pulverizing the soil. The plants should be set in early November to secure best results and should be planted about eighteen inches apart. Thorough watering during a dry period will aid the plants to become established and will be well rewarded by more beautiful flowers.

Price, 25c each; \$2.50 per doz.

Champs Elysee. Fine rich crimson, strong grower, highly desirable.

Eclairer. Light rose-carmine with a tint of purple. An extremely long bloomer, lasting long into the Fall.

H. O. Wijers. White with red eye; strong grower, free blooming.

Miss Lingard. A very early-blooming, white variety with a pale pink center.

Mrs. Jenkins. A very early, free-blooming variety; tall, strong grower. Flowers large, pure white.

R. P. Struthers. Cherry-red suffused with salmon; strong grower and continuous bloomer.

Cannas

Unusual effects can be secured by the judicious planting of Cannas, because they lend themselves to almost any planting plan, being particularly effective when planted in solid masses or for border work. There is no flower that gives more universal satisfaction; it continues in bloom the entire Summer from the time they are planted in the Spring. The Cannas will thrive in almost any soil, but like most other perennials they prefer a very rich, properly prepared bed.

Price, 25c each; \$2.50 per doz.

Eureka. Extra large, creamy white flowers; foliage a beautiful light green.

Canna, King Humbert.

Hungaria. Of rather dwarf, compact growth, with green foliage; flowers are a rich pink, borne in large clusters throughout the season.

King Humbert. Truly the king of Cannas. Its foliage, which is of large size and a deep bronze, is striking; flowers are borne in great profusion and are a rich coppery scarlet. The best general purpose Canna we know of.

Mrs. Alfred F. Conard. Salmon-pink flowers, clean and full petaled; the most popular and satisfactory of the pink Cannas.

Yellow King Humbert. A sport of King Humbert, but with green foliage and golden yellow flowers dotted with red. Strong grower and wonderful bloomer.

Eclairer.

Miss Lingard.

Champs Elysee.

Edulis Superba.

Festiva Maxima.

Felix Crousse.

Peonies

The Peony does best in a location sheltered from the long hot afternoon sun, an eastern exposure being the preferred location. The soil should be thoroughly prepared and enriched before planting. In planting, the bulbs should not be placed more than two inches below the actual level of the soil. Planting should be done in December or January to secure best results.

Unnamed Peonies, by color only, can often be bought for less than the named varieties, but the difference in price is more than made up for by the difference in the beauty and fragrance of the flowers produced by the named varieties. We are listing only one each of the white, pink and red, varieties. Highly satisfactory for planting in the South.

Price, 50c each; \$4.50 per 10.

Festiva Maxima. The standard white variety; flowers are extra large, pure white, faintly flecked with crimson. Free blooming, very large and is borne on strong stems.

Edulis Superba. A soft, rosy pink flower; of large size and great fragrance. Early and very free blooming.

Felix Crousse. Brilliant; flaming; very double red flowers. The large, ball-shaped flowers are very attractive and desirable. Blooming somewhat later than the white or pink varieties listed above.

Yucca

(Bear Grass or Adam's Needle).

A rather peculiar plant with stiff, heavy foliage, which is evergreen. Sometimes called Spanish Bayonet. Among hardy ornamental foliage and flowering plants this stands at the head of the list. Its broad, swordlike foliage and tall, branched spikes of large, fragrant, drooping, creamy white flowers during June and July make it an effective plant for all positions. Flowers are produced on a stem from four to six feet in height, and it may be used to good advantage in mass planting. **Price, 60c each; \$5.00 per 10.**
